☰ Execute shell ?

Command

See the list of available environment variables

```
yum install httpd -y
service httpd start
echo "velocity all" >> /var/www/html/index.html
chmod -R 777 /var/www/html/index.html
```
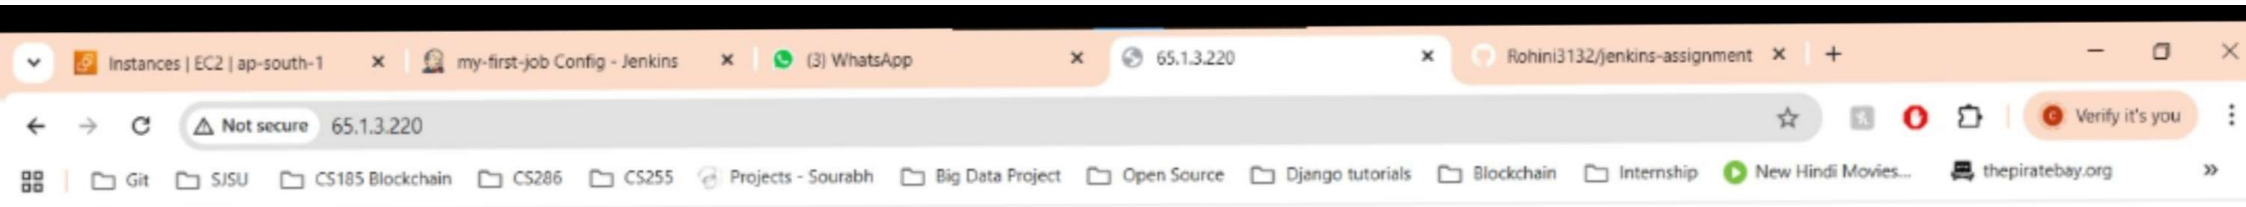

Advanced ⌄

+ Add build step

Post-build Actions

Define what happens after a build completes, like sending notifications, archiving artifacts, or triggering other jobs.

+ Add post-build action

Save   Apply

velocity all velocity all
